Web Software Tools

Introduction

The bonsai art website will display the beautiful bonsai trees, different type of trees might available. This website that I'm going to create is nice website since I am a person who likes bonsai arts. I chose to propose this bonsai website since this is one of my hobbies, creating a bonsai. I have bonsai trees in my house that I trained about more than ten trees, and most of them are balete trees. I choose to train balete trees because it is easy to train and has a high survival rate among other trees. Below are the features of my websites.

Objectives

1. To create a website about bonsai
2. To have a chance of a plant seller to promote their products
3. This website gives the idea of how wonderful bonsai trees is
4. This website will emphasize the artist who made the bonsai the years and how much the bonsai worth.

Features

Home

In this section it shows the home screen of my website where there will be a sales display wherein the visitors can click the order button and place an order as it is meant. It also shows here the latest bonsai display and even the famous bonsai trees.

About us

This section displays the content of which this bonsai website is about.

Shop

This section displays the shops that might register on my website and selling a bonsai plant. Here there will be a contact of the shop or just a shop list.

Location

This section shows the location of the shops registered on my website.

Contact

Shows my contacts, such as email address, phone number and so on.

Search

It will allow the user to search the everything inside my website

Log in

It is a button where the newcomer can sign up or even log in on my website to be able to save and be update on happenings.
